

eni Rotra bike 80W-90

eni Rotra bike 80W-90 is a gear oil specifically developed to lubricate transmissions of bikes with "E.P." (extreme pressures) characteristics for severe service conditions.

CHARACTERISTICS (TYPICAL VALUES)

SAE Grade		80W-90
Density at 15°C	kg/m ³	895
Viscosity at 100°C	mm ² /s	14.0
Viscosity at 40°C	mm ² /s	130
Viscosity at -26 °C	mPa·s	120000
Viscosity Index	-	100
Flash Point COC	°C	240
Pour Point	°C	-27

PROPERTIES AND PERFORMANCE

- Its antiwear characteristic together with chemical stability and oxidation resistance keep bearings and gear teeth in optimum condition and permit long drain intervals.
- The antirust property of **eni Rotra bike 80W-90** effectively protects gears and bearings against rust and corrosion, even when moisture is present.
- Its high viscosity index ensures that lubricated parts operate correctly over a wide temperature range.
- The product is also recommended for use in all those gearboxes and final drives for which manufacturers prescribe gear oils with API GL-3 performance level.

SPECIFICATIONS

eni Rotra bike 80W-90 meets the requirements of the following services:

- API GL-4
